## Advisory, delivery, and ongoing support to improve operations and productivity.

Sapphire's IT Consulting service focuses on implementing, integrating and optimizing powerful technology systems into your core business processes, and maximizing the value derived from IT.

Sapphire creates innovative solutions that maximize ROI, and help answer today's questions such as:

- *How can we integrate and streamline better?*
- *Are there better cost models?*
- *What is "Big Data" and what does it mean to us?*
- *Do we have a digital strategy that is optimized and measurable?*
- *Is mobility computing delivering positive results?*
- *How can we better secure our data and systems?*
- *What is the impact of Outsourcing to our business?*

Our work spans the complete Systems Lifecycle - from Advisory, to Delivery, to on-going Support for both enterprise infrastructure and line of business applications. We incorporate industry proven methodologies and techniques such as Agile, ITIL and PMI.

IT consulting services are offered on a staff augmentation, right-to-hire or project basis.
